## ■ Notice

1. Be sure to confirm the signification of sign above the pole before connection.

L: LINE (AC input)      N: Neutral (AC input)       $\equiv$  (FG): Protective Ground

-V (COM): DC output cathode

+V: DC output anode

VADJ: Output Voltage adjustment

2. Switch power supply can be used 110V and 220V AC power for input, The AC Voltage switch is in the top of the power supply sub-rack. Before plug in please check the voltage position is correct or not otherwise may take a permanent damage in this power supply.
3. Be sure to keep the ground wire connection, avoid electric shock and common mode interference or differential mode interference.
